— The most unique brush in the world —

Actisweep has developed a unique brush: its technical characteristics make it the most efficient brush on the market.

Based on our experience with push brooms, we use the same polypropylene brush for the AniZen animal welfare brush.

Its durability, flexibility and robustness allow the AniZen brush to have incomparable longevity and provide great comfort to your animals.

Non-motorised, the animal applies as much strength as it desires when it scratches.

Same brush as
brooms

C-shaped brush

To better fit the shapes.

"A real revelation on my farm!"

Since installing the ANIZEN brush, my suckler cows are more relaxed, their coat is healthier and shinier, and tensions in the herd have significantly decreased. Robust, durable and designed for animal well-being, this brush has transformed the daily lives of my animals... and mine.

I recommend it to all breeders!

| Designation | Dimensions (HxPxL) | Weight | Reference |
|-------------------------|--------------------|--------|-----------|
| Wall-mounted C-brush | 172 x 98 x 22 cm | 72 kg | CE86C005 |
| C-shaped brush on stand | 214 x 133 x 80 cm | 118 kg | CE86C001 |

Double brush

To scrape a larger area.

"A real plus for my dairy cows!"

Since installing ANIZEN brushes, my cows are cleaner, more relaxed and the tension around the milking robot has significantly decreased. They rub themselves for a long time, with pleasure, and this is reflected in their well-being... and their production! A sustainable investment that I recommend to all breeders.

| Designation | Dimensions (HxPxL) | Weight | Reference |
|-----------------------|--------------------|--------|-----------|
| Double wall brush | 78 x 36 x 30 cm | 38 kg | CE86C003 |
| Double brush on stand | 180 x 74 x 80 cm | 88 kg | CE86C002 |

Single brush

Just to scratch!

“Small, but incredibly effective!”

Thanks to its compact size, this brush allows pets to precisely target the area to be scratched, just as we would ourselves.

Space-saving and affordable, you can install several to please different groups of animals, without location constraints.

A real well-being asset!

Available with a softer fibre for sensitive animals.

| Single wall brush | 39 x 36 x 30 cm | 19 kg | CE86C006 |
| Single wall brush, soft | 39 x 32 x 30 cm | 16 kg | CE86C010 |

Solution installation

To meet all your requirements.

On foot, fixed to the ground

The **C-shaped** animal brush and the **double** brush are anchored to the ground and can be adjusted in height. Their hot-dip galvanized steel base is designed to protect the animals' feet first and foremost, but also for your daily life.

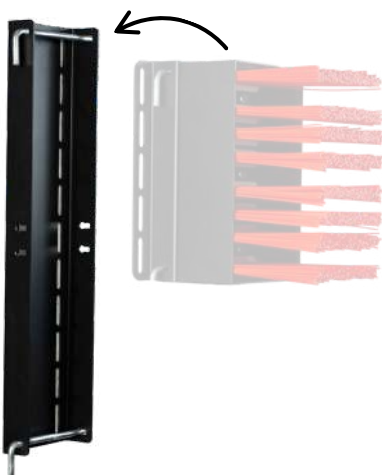

Easy access for all your work! The brush removes effortlessly from its base to allow you to move freely with your equipment.

Wall mount / barrier

Made of steel, this attachment allows the 3 types of brushes (single, double and C) to be installed on **any vertical support** (wall, barrier, post, etc.).

Equipped with numerous "lights", this allows you to manage the fixing height to optimize the installation according to the size of your animals.

Quick coupler

This bracket allows you to attach single or double brushes with a simple pin. Having several "quick-release" attachments on your farm allows you to easily change the location of your brushes.

| Designation | Dimensions (HxPxL) | Weight | Reference |
|----------------------|--------------------|--------|-----------|
| AniZen quick release | 78 x 7 x 20 cm | 7 kg | CE86C007 |

A word from the expert

For the correct positioning of the brushes.

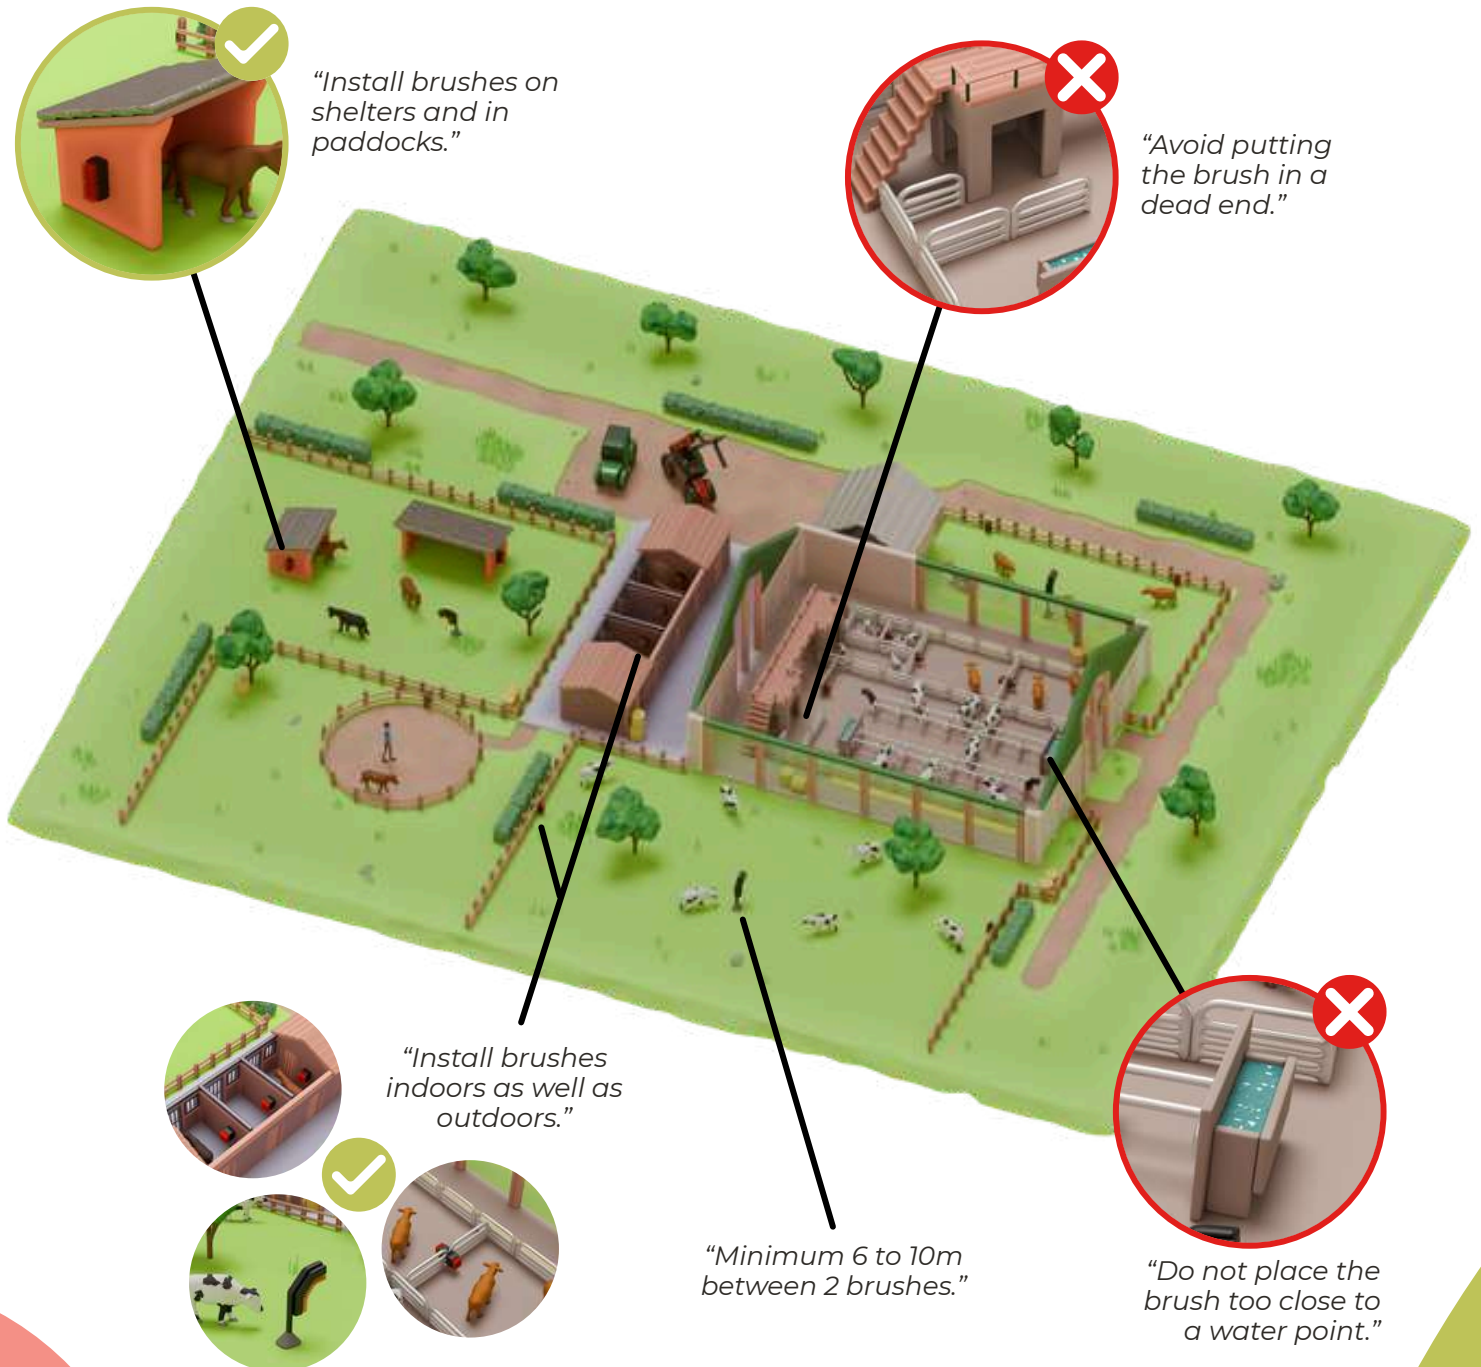

Who am I?

Pauline GARCIA, passionate farmer, breeder of Salers and Aubrac beef cows in Cantal. I also wear other hats, such as animal welfare expert, animal behaviorist, and trainer.

Author and populariser on social networks (@etho_diversite), I share my knowledge of ethology to raise awareness among breeders and all other livestock professionals.

As an Anizen brand ambassador, I promote innovative solutions for animal care, comfort, and improved production.

In the illustration below, I'll give you some tips on how to install brushes. I recommend using one brush for every 8 to 10 animals.
