The Actisweep concept

An innovative solution for cleaning.

— The most unique brush in the world —

Actisweep has developed a unique brush: its technical characteristics make it the most efficient brush on the market.

Our polypropylene brushes are available in two versions: the standard red brush and the black brush known as the "finishing brush."

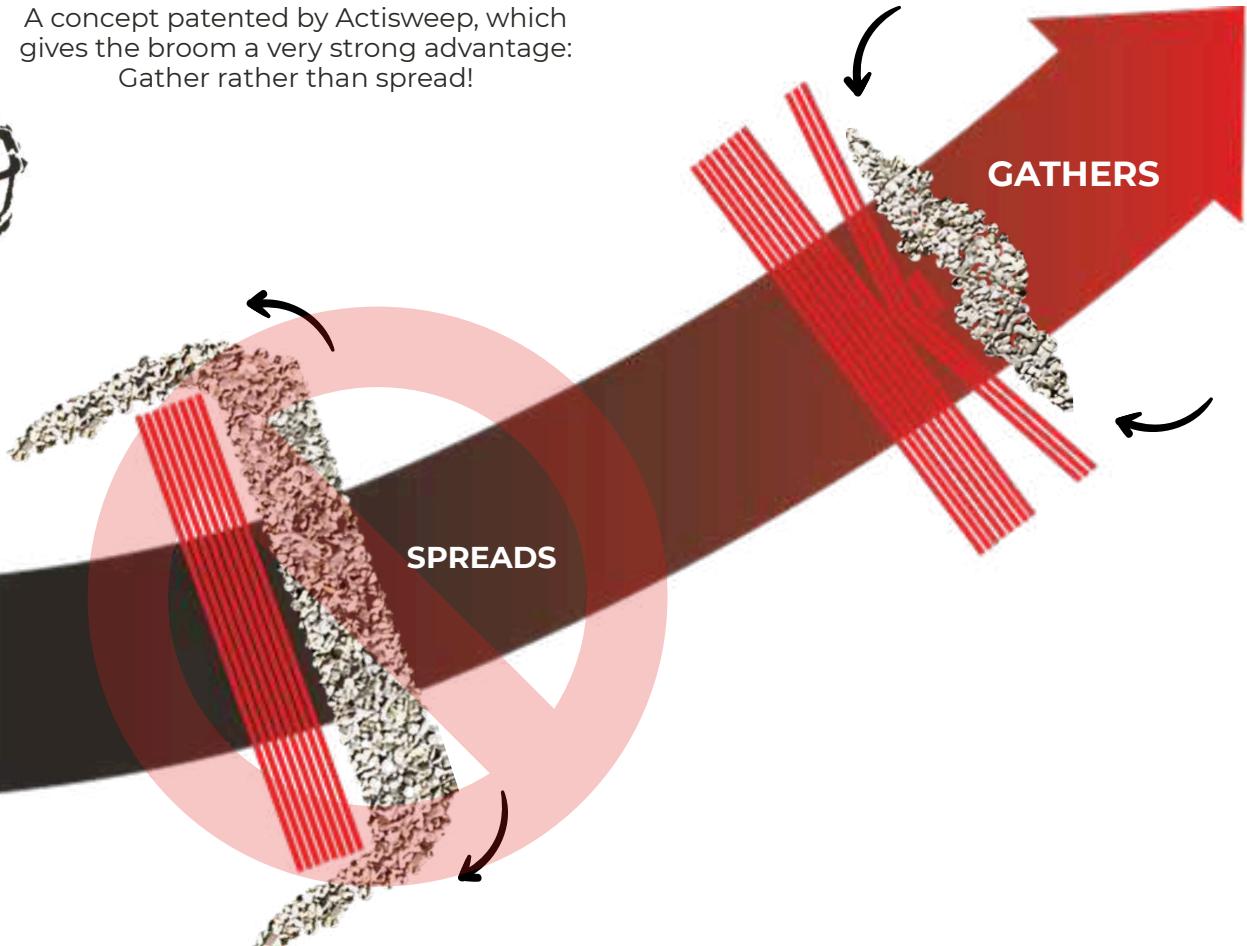

The finer bristles of this brush allow for a more finished cleaning.

On each of the brooms, the rows of brushes are inserted into "rails". This offers the possibility of replacing only the brushes when they are worn, rather than changing the entire broom.

Finally, depending on the broom model, the length of the brushes varies. The most robust brushes can last up to 10 years!

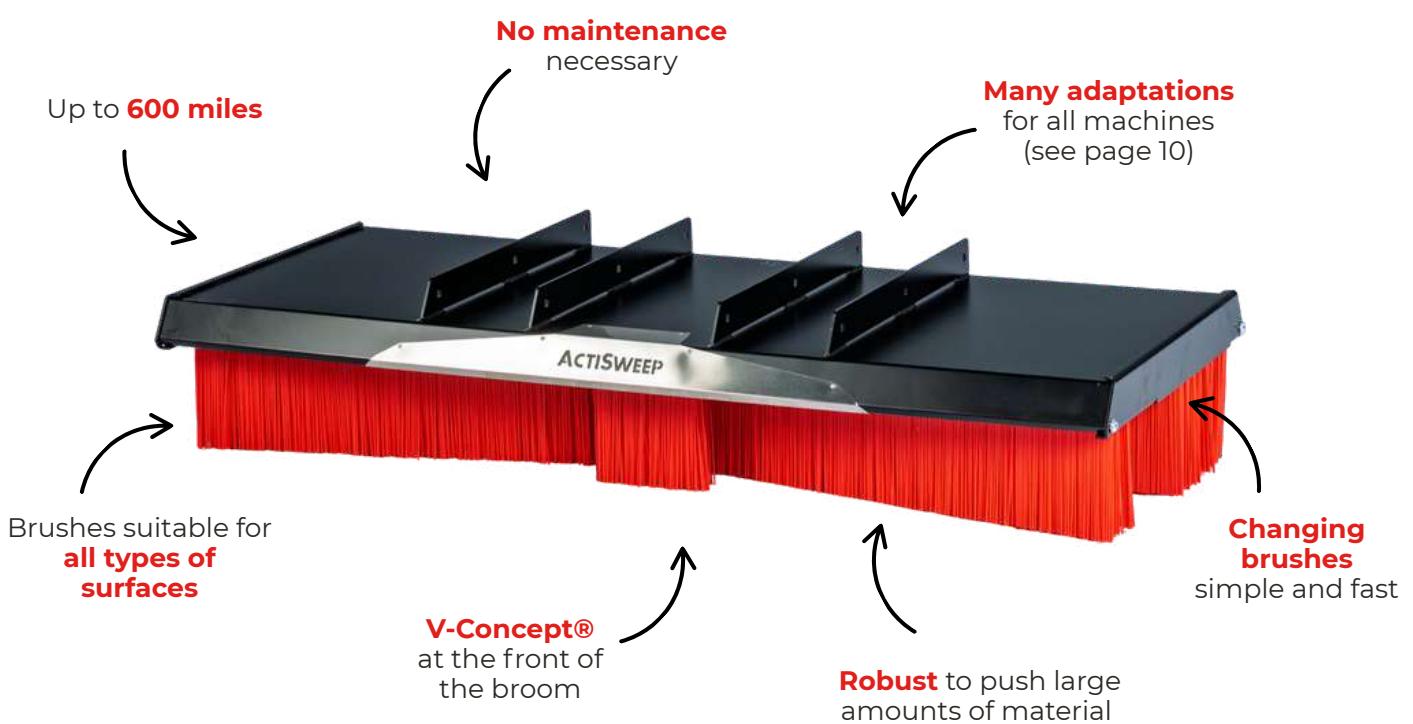

— The 'V-Concept®' —

A concept patented by Actisweep, which gives the broom a very strong advantage:
Gather rather than spread!

A complete range

| V7 | V9 | V13 |

Skin

- Adaptation for shovel
- Type S40 / 45 / 50 / 60
- Hot-dip galvanized steel
- Allows hitching in seconds

| Designation | Weight | Reference |
|--------------------------------|--------|------------|
| Bolt-on shovel interface plate | 54 kg | CE86D002-A |
| S40 excavator adaptation | 76 kg | CE86D002-B |
| S45 excavator adaptation | 92 kg | CE86D002-C |
| S50 excavator adaptation | 92 kg | CE86D002-D |
| S60 excavator adaptation | 110 kg | CE86D002-E |

Front loader

- Euro front loader attachment
- Hot-dip galvanized steel construction

| Designation | Weight | Reference |
|-------------------------------------|--------|------------|
| Adaptation Euroquick 1500/1800/2400 | 50 kg | CE86B003-T |

Bale clamp

- Universal adapter for bale clamps
- Dimensions : L 1055 x l 700 x H 700 mm
- Hot-dip galvanized steel construction

| Designation | Weight | Reference |
|-----------------------|--------|------------|
| Bale clamp Adaptation | 68 kg | CE86B003-B |

The options

Complementary items to brooms.

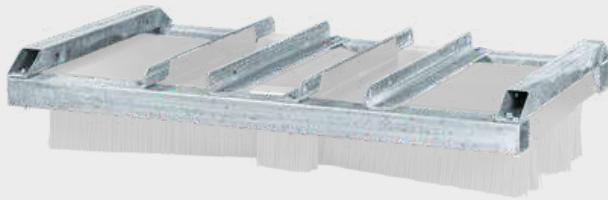

Kit angulation

- Adaptation for forklift or bucket
- Allows you to angle the broom to windrow on one side.
- 10 fixed positions over 360°
- Hot-dip galvanized steel construction

| Designation | Weight | Reference |
|---------------------|--------|------------|
| Kit angulation 360° | 62 kg | CE86A004-C |

Bull bar

- Heavy-gauge steel frame protecting the broom around its entire periphery.
- Protects the structure of the broom in the event of an impact
- Hot-dip galvanized steel construction

| Designation | Weight | Reference |
|---------------|--------|------------|
| Bull bar 1500 | 69 kg | CE86A003-E |
| Bull bar 1800 | 74 kg | CE86A003-F |
| Bull bar 2400 | 85 kg | CE86A003-G |

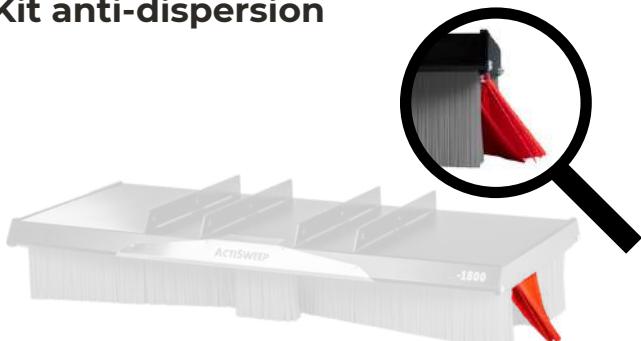

Storage feet

- Ideal for raising the broom to prevent the brushes from bending under the weight of the structure.
- Allows the broom to be stored on a rack or at a height so that it is stable.
- Hot-dip galvanized steel construction

| Designation | Weight | Reference |
|--------------|--------|------------|
| Storage feet | 56 kg | CE86A004-D |

Kit anti-dispersion

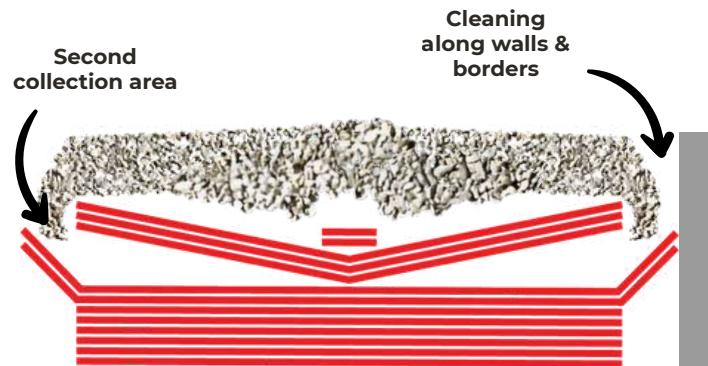

V7 V9 V13

- Easily sweep along sidewalks or walls
- 2 rows of polypropylene brushes on each side of the broom
- Allows for a second collection area in the center of the broom

| Designation | Weight | Reference |
|----------------------------|--------|-------------|
| Kit anti-dispersion V7 | 6 kg | CE86A003-AC |
| Kit anti-dispersion V9/V13 | 10 kg | CE86A003-W |

Finishing brush kit

V7 V9 V13

- A superior quality sweep to standard fibre (red) thanks to a very fine fibre
- Application for fine dust (cement, flour, potato dust, etc.)
- This option only consists of 5 rows of brushes.

| Designation | Weight | Reference |
|------------------------------|--------|------------|
| V13-1500 Finishing Brush Kit | 107 kg | CE86A001-M |
| V13-1800 Finishing Brush Kit | 125 kg | CE86A001-N |
| V13-2400 Finishing Brush Kit | 160 kg | CE86A001-O |
| V13-3000 Finishing Brush Kit | 348 kg | CE86A001-P |
| V13-3600 Finishing Brush Kit | 418 kg | CE86A001-Q |
